

SMT25 THE ULTIMATE RIM-MOUNT GOOSENECK MIC HOLDER

OVERVIEW

The SMT25 is a professional, simple to use shockmount system that attaches to any standard microphone stand with either 3/8" or 5/8" threads. The SMT25 is provided with a 3/8" threaded inset that allows it to be used with European-style mic stands. To use with 5/8" mic stands, simply remove the adapter.

Optimized for use with a wide variety of microphones, the SMT25 will work with microphones having an OD (outer diameter) of .82" - 1.06" / 21 mm - 27 mm.

TO OPERATE

The microphone is held in place by the foam lined metal housing in the center of the shockmount. To open up the diameter and insert microphone, squeeze the two metal clips together between your thumb and fingers. (see Fig. 1)

The wingnut located at the bottom of the clip (see Fig. 2) will control the rotation of the shockmount 180 degrees. Simply loosen (counter-clockwise) or tighten (clockwise) the wingnut as needed.

INSTRUMENT MICROPHONES

The SMT25 is ideally suited for instrument condenser microphones such as the ADX51, SCX1 and SCX25a — and a wide variety of other popular microphones on the market. The SMT25 will hold the microphone securely in just about any position. With condenser microphones, it's important that the element and all ports in the housings and grills remain completely exposed.

VOCAL MICROPHONES

The SMT25 will also work with vocal microphones such as the OM series and the VX4 (pictured), and a wide variety of other popular microphones on the market. Since vocal microphones tend to be larger in diameter (24-25mm on the average) they may take a bit more finesse to install. The mic may have to be worked into the housing by carefully twisting the mic back and forth as you are pushing into position.

FEATURES

- Provides maximum isolation from vibration
- Heavy duty shock cord
- Metal wingnut locks holder into desired position
- Works with a wide variety of popular microphones
- Tension fit holds microphone firmly in place

FIG. 1: Squeeze together the metal clips to open up the diameter of the center metal tube.

FIG. 2: Wingnut will rotate the position of the shockmount 180 degrees.

FIG. 3: VX-5 vocal microphone
