

When imagining the concept of the Futura, Foxgear engineers drew inspiration from lessons and successes learned in the R&D of our now famous Echo. We wanted a pedal that had at heart a focused “ambient” sound. The Futura’s impressive ambience is reached through its ability to make the repeats disappear while you play. The Futura actually uses three circuits in combination to create a mixable reverb AND delay that permits the player to set it, for example, to a great slapback echo + reverb, and then to be able to play an arpeggio without having to change settings.
