29. 【PHONES/OUTPUT】 jack
30. 【DC 9V】 power adaptor jack

Ref Nr.: I30.I08

II. Preparation for Use

- **Battery power** – For use without an AC/DC power adaptor, this instrument requires the use of six “AA” batteries. Remove the back-panel battery cover and load the batteries one by one, ensuring correct polarity. Replace the cover when the compartment is fully loaded. Note: The use of new alkaline batteries is recommended. Weak batteries will result in distortion and decreased volume and should be replaced. Always remove the batteries when the instrument is stored and not in use for an extended period.
- **AC/DC power adaptor** – For use with a power adaptor, connect the output plug of the adapter to the 【DC 9V】 jack on the rear panel, then connect the other end to a suitable electrical outlet. The use of non-original or aftermarket adaptors is not recommended. Never unplug the adaptor or plug by pulling on the cord.
- **Headphones (not included with all models)** – Connect headphones to the 【PHONES】 jack. The internal stereo speakers will be automatically shut off when earphones are plugged into the 【PHONES】 jack. Caution: Listening to headphones or earphones at moderate or high volume levels may damage your hearing!
- **Audio outputs** - When connecting to external amplifiers, first turn off power to both the amplifier and keyboard and plug the right end of the audio cable into the 【PHONES/OUTPUT】 terminal on the rear panel and the other end to the amplifier or external device. Last power the keyboard and amplifier on.
- **Microphones (not included with all models)** - By connecting the keyboard to a microphone via the 【MIC】 jack, you can sing songs while playing the keyboard.
- **Audio inputs** - The instrument is equipped with a built-in stereo input function. You can utilize the instrument for this use by connecting it to your mobile phone, MP3, computer or any other input devices. Before connecting, first turn off the instrument and plug the right end of the audio cable into either side of the 【AUDIO INPUT】 jack on the rear panel and the other end to the external device. Then turn the instrument on.

III. Basic Operation

Press the 【POWER】 switch to turn on the instrument with “120” appearing on the LCD screen. The instrument cannot be played until “120” displays. The instrument is equipped with a power-saving function. The instrument will automatically enter sleeping mode without being touched or operated for 15 minutes. All parameters will be reset after entering sleep mode. You can press ANY button to wake up the instrument.

• Master Volume

Press the 【MASTER VOL+】 or 【MASTER VOL-】 button to increase or decrease the master volume. Pressing 【MASTER VOL+】 and 【MASTER VOL-】 simultaneously will reset the master volume to the default value. Adjustment of the master volume will also impact ACCMP volume. Do not leave the volume at maximum level for any extended period.

• ACCOM Volume

Press the 【ACCOM VOL+】 or 【ACCOM VOL-】 button to increase or decrease the Accompaniment volume. Pressing 【ACCOM VOL+】 and 【ACCOM VOL-】 simultaneously will reset the Accompaniment volume to the default value.

• Selecting Timbres

You can select timbres at the initial interface or press the 【TIMBRE】 button to initiate timbre operation. The instrument features 255 timbres from code 000 to 254. You can change the current timbre by pressing the numbers or 【+】 / 【-】 on the numeric pads.

• Percussions

The instrument features 8 panel percussions with pictures below the buttons. Press the panel percussion buttons according to the underlying pictures for desired percussions.

The instrument also features 61 keyboard percussions. Press the 【KEYBOARD PERCUSSION】 button to enable the keyboard percussion function. Select the sound to play by pressing the key corresponding to the picture above it. Press the 【KEYBOARD PERCUSSION】 button again to disable the function.

• Demonstrations

The instrument provides 24 demonstration songs from code 00 to 23. Press the 【DEMO SONG】 button to play all of the demonstration songs in sequence. Pressing the 【DEMO SONG】 button again while it’s playing a song will skip the current demonstration and jump to the next song. Press the 【START/STOP】 button again to stop the demonstration songs. To switch to another song, press the numbers or 【+】 / 【-】 on the numeric pads. The chosen song will be played in a single cycle.

IV. Auto-Rhythm

• Selecting a Rhythm

The instrument features 255 rhythms varying from 000 to 254. Press the **[RHYTHM]** button to initiate rhythm selection function. To switch to another the rhythm, tap the corresponding number or **[+]** / **[-]** on the numeric pads. You can press the **[START/STOP]** button to switch between timbre selection function or rhythm selection function.

1.To start a rhythm

1) Press the **[START/STOP]** button to start the accompaniment rhythm.

2) Press the **[SYNC]** button to initiate “SYN” display, and then press any key in the Chord Section (i.e. the leftmost 19 keys on the keyboard) to start the rhythm and accompaniment simultaneously.

2. Press the **[FILL IN]** button to punch in an interlude during the rhythm.

3.To stop the rhythm

Press the **[START/STOP]** button during the rhythm to stop the rhythm immediately.

• Adjusting the Tempo

Press the **[TEMPO+]** or **[TEMPO-]** button to quicken or slow the tempo. Pressing the **[TEMPO+]** and **[TEMPO-]** buttons simultaneously will reset the tempo to the default value at 120 beats per minute.

V. Auto Bass Chord

• Single Chord

When the rhythm is activated, press **[SINGLE CHORD]**. After the “Sin” is shown on the screen, you can play a single chord on the keys in the chord zone of the keyboard.

Press **[SINGLE CHORD]** again, “OFF” will be shown on the screen, and the single chord function will be disenabled.

Single-Finger Chord Scales

Fingered Chord Scales

• Fingered Chord

When the rhythm is activated, press **[FINGERED CHORD]**. After the “Fin” is shown on the screen, you can play a fingered chord on the keys in the chord zone of the keyboard.

When **[FINGERED CHORD]** is pressed again, “OFF” will show on the screen, and the fingered chord function will be disenabled.

VI. Voice Effects

• Sustain

Press the **【SUSTAIN】** button to add sustain effect to your performance. Press **【SUSTAIN】** button again to disable the function.

• Vibrato

Press the **【VIBRATO】** button to add vibrato effect to your performance. Press **【VIBRATO】** button again to disable the function.

VII. Recording and Programming

• Recording

Press the **【REC】** button to initiate “REC” display. This function allows you to record and save your performance throughout “RECORD” status. When storage is full, “FUL” will appear in the display, and further recordings will stop automatically.

Press the **【PLAY】** button to play the recorded notes, with “PLA” appearing on the screen. You can press the **【PLAY】** button without finishing the recording. The instrument will play back the current recording and continue recording after the playback with “REC” appearing on the screen. Press the **【PLAY】** button again to stop the playback.

Press the **【START/STOP】** button again to disable the recording function. Your recording will be deleted after you exit from the function.

• Programming

Press the **【PROG】** button to initiate “PRG” display. The keyboard percussions function will be enabled automatically. You can tap the corresponding keys to program up to 32 unique rhythms, with “FUL” appearing on the screen.

Press the **【PLAY】** button to play back the programmed rhythms.

Press the **【START/STOP】** or press the **【PROG】** button again to exit from the programming function. The programmed songs will be deleted after you exit from the function.

VIII. Intelligent Guide Function

• One Key

Press the **【ONE KEY】** button to initiate ONE KEY tutorial. Select the desired song for practicing by pressing the numbers or **【+】** / **【-】** in the numeric pads. With this function, you can play the melody of a song just by pressing ANY single key in accordance with the rhythm. The playback will continue by pressing any keys. Simply play a key in time with the music and the playback will continue.

Press the **【START/STOP】** button or press the **【ONE KEY】** button again to exit from the function.

• Follow

Press the **【FOLLOW】** button to initiate FOLLOW tutorial. Select your desired song for practicing by pressing the numbers or **【+】** / **【-】** in the numeric pads. In this function, the instrument will wait until you can play the notes correctly. The instrument will continue the playback if you play the notes incorrectly.

Press the **【START/STOP】** button or press the **【FOLLOW】** button again to exit from the function.

• Ensemble

Press the **【ENSEMBLE】** button to enable ENSEMBLE tutorial with “GUIDE” appearing on the LCD. Select the desired song for practicing by pressing the numbers or **【+】** / **【-】** in the numeric pads.

This function is designed for practicing both pitch and timing. When the function is selected, the song playback will mute the keynotes and wait for you to play the notes correctly, unless you cannot catch it within 3 seconds. If this happens, the keyboard will automatically replay the keynote.

Press the **【START/STOP】** button or press the **【ENSEMBLE】** button again to exit from the function.
