DDJ-ERGO-V
WITH VIRTUAL DJ LIMITED EDITION
PLAY OUT MORE

The stylish, compact and easy-to-use controller that delivers simplicity without compromise. Designed for maximum DJing pleasure.

DDJ-ERGO-v: NO COMPROMISE

Virtual DJ LE included / Pioneer original GUI / Four-deck control / USB powered / Optimised audio circuitry / Features inherited from Pioneer pro-range / Fully MIDI assignable / Light display for visual dimension to mixing / Laptop integration / MIC in and out / P-Lock fader caps

Make way for the Pioneer DDJ-ERGO-v controller: the all-in-one solution that was born to put the DJ experience at the centre of every performance. With its sharp design and layout, the DDJ-ERGO-v not only looks good but feels good too, delivering effortless operability of the included Virtual DJ Limited Edition* software.

This unique controller boasts simplicity of set-up and performance without compromising sound quality or features. Its portable dimensions and plug-and-play arrangement make it perfect for DJs who love to play out. The controller is fully operational through a single USB cable to a computer or laptop – with no drop in power to the audio outputs or LED displays – so there's no need for an external power supply.

The DDJ-ERGO-v mirrors the layout of Pioneer's popular DDJ-T1 and DDJ-S1 controllers, for ultimate ease-of-use. All the DJ's favourite controls are pre-assigned to dedicated knobs and buttons, and are intuitively positioned on the unit. So DJs can create mind-blowing mixes without the need to press Shift – except for the most advanced software features. Four-deck mixing with autosync, eight sample decks, FX filters, hot cues – even video mixing and scratching – are available at the touch of a button.

There is no compromise on quality either. Unusual at this price point, the DDJ-ERGO-v has inherited high-quality components and features from Pioneer's

pro-DJ range, including top-of-the-range audio circuitry for the master output. And, unlike many USB powered devices, the DDJ-ERGO-v has excellent bass response and minimal distortion.

To increase the pleasure factor even more, Pioneer has added a visual dimension: the Pulse Control light display helps DJs to see what features and tracks are in play and even how accurate their beat matching is. The controller's eye-catching design features a black top panel and black and silver half-tone Jog Wheel. With its rounded edges and white side panel, the DDJ-ERGO-v looks good in the studio, booth and at home.

Further emphasis on the DJ experience comes via the DDJ-ERGO-v's unprecedented flexibility. As well as coming bundled with Virtual DJ LE, its MIDI output makes it compatible with most DJ software on the market, transmitting up to 324 commands to MIDI devices. Traktor users can control their favourite software by applying the included TSI setting file.

Detachable legs raise the back of the mixer for convenient operation while seated, and create a laptop dock for the keyboard to slip under, saving on space while keeping the screen in sight at all times.

The Pioneer DDJ-ERGO-v: get the party started in style.

* The DDJ-ERGO-v comes bundled with Virtual DJ Limited Edition from Atomix Productions

DDJ-ERGO-v: INTUITIVE CONTROL

The DDJ-ERGO-v's DJ-friendly layout offers the same blocking as the included Virtual DJ software†, with sections for mixing, deck control, effects, samples and browsing. And with all the DJ's favourite features pre-assigned to dedicated buttons and knobs, creative control is always at your fingertips.

MIXING

FUNCTION BUTTON: Switch the software between Mixer, Video and Scratch modes.

DECK CONTROL: Select decks ABCD for four-channel fun.

AUTO LOOP KNOB: One press loop activation, then simply rotate to alter loop length.

LOOP IN/OUT: Set the loop start/stop point, or use Shift to push the loop back or forward by one beat.

HOT CUE BUTTONS: Set and play four Hot Cues.

SYNC BUTTON: Automatically sync a track to the Master Deck or use Shift to set it as Master Deck.

SHIFT: Easily access a second level of advanced software features, identifiable by a grey background on the controller.

CROSS FADER: Mix with confidence as P-Lock cross fader caps won't come off during performance.

PULSE CONTROL: ADDING A VISUAL DIMENSION

Built-in LEDs on each channel fader and a translucent Jog Wheel with red and blue LEDs around the ring enhance DJing precision and add a new, fun visual dimension to the art of DJing.

BEAT PULSE: Red LEDs in the channel faders match the beat of the track in play. And, with the brightness reflecting output levels, you'll have a visual sign if you've left a track in the mix.

LAUNCH PULSE: Know when a track is loaded: a red light travels from the Load Button to the relevant Jog Wheel.

FX PULSE: Red and blue LED light patterns around the Jog Wheel give an eye-catching representation of the FX and filters, along with intensity as they are applied.

MIX PULSE: A blue LED on the Jog Wheel lets you see how close your beat-matching is; the closer the match, the more intense the light shines.

BROWSING AND LOADING BLOCK

ROTARY KNOB: Turn while pressing Shift to browse folders, and press to select.

LOAD BUTTONS: Press to load tracks to the desired deck (A/C or B/D).

SAMPLE DECK

SAMPLE BUTTONS: Hit for instant access to 8 Sample Banks.

EFFECTS

EFFECT CONTROL KNOB: Twist to select from your favourite Virtual DJ effects.

FX BUTTON: Press to activate stunning FX sounds.

FX1 BUTTON: Turn the Beat Grid on and off for seamless mixes.

FX2 BUTTON: Select to add Flanger FX to your tracks.

FILTER KNOB: Turn right for high-pass and left for low-pass filtering.

EFFECT PARAMETER KNOB AND BUTTONS: Activate and control effect parameters 1-3, or press Shift for effect parameters 4-6.
