5. Indicator.

a. Power ON Indicator:

This red light glows when the DC supply and power Switch ON. It indicates that the receiver is on.

b. Reception Indicator:

This indicator does light during standby. When microphone signal is received, The green or yellow indicator light to indicate the reception of microphone.

c. Audio peak Indicator:

This red light flickers when the audio signal from the microphone approaches the overload clipping level. It is affected by the transmitter gain control setting and the loudness of your voice.
