

PRODUCER BUNDLE

HOOKUP GUIDE

Congratulations on your purchase of the Producer Bundle!

This handy kit has all of the key components you need to get professional recordings at home or on the go. The diagram below will help you get everything hooked up.

The **EM-91C** condenser microphone **1** is connected to channel **1** **2** and the **EM-89D** microphone **3** on channel **2** **4** of the **Onyx 2•2** interface. Check the **Onyx 2•2** manual for tips on getting gains and monitoring set up.

To get sound from the **EM-91C**, make sure the **+48V** switch on the **EM-91C** is on, this will supply power to the mic and don't worry, the **EM-89D** will not be damaged.

To hear yourself and anything else connected to the interface, connect your snazzy new **MC-100** headphones **5** to the phones jack **6** (it's got a cute little headphone icon ). The level for these is controlled via the knob directly above the jack.

Last but not least, connect your **Onyx 2•2** via USB **7** to your computer. For a detailed guide, head back into the manual to get the lowdown.

Want a bit more 'room' in your monitoring? Visit Mackie.com for all of your studio monitor needs.
